HDM CORP. RENEWS EHNAC ACCREDITATION

OMAHA (Neb.)—HDM Corp., an industry leader in health care data management, announced today that it has renewed its full accreditation status by the Electronic Healthcare Network Accreditation Commission (EHNAC). EHNAC accredits entities that send or receive HIPAA regulated transactions, or transports or processes EDI transactions between two or more trading partners in the health care community.

Lisa Lechowicz, CEO and Founder of HDM Corp. said, “The renewal of the EHNAC accreditation continues to demonstrate the company’s commitment to ensuring that the safety and security of health care information is a priority.”

“The federal government created HIPAA to protect the privacy of the public when handling health care information,” said Lechowicz. “Having the processes and security in place to protect each person’s health care information is our top priority. The renewal of our accreditation from EHNAC demonstrates that we continue to achieve this goal.”

EHNAC is an independent, not-for-profit accrediting agency that provides independent peer evaluation of an organization’s ability to perform at industry-established levels. EHNAC’s function is to promote administrative simplification and cost savings in the health care industry, and to provide the health care transaction industry with an independent capability to develop industry standards, known as EHNAC criteria.

Lee Barrett, Executive Director of EHNAC, said of HDM Corp., “HDM joins a select group of clearinghouses that have demonstrated to independent third party evaluators their ability to deliver their services consistent with the only standards in the industry that measure the overall business practices of a clearinghouse.”

ABOUT HDM CORP.

HDM Corp. is an Omaha-based company dedicated to helping clients find a better way to process health care transactions. The company processes more than 30 million health care transactions per year and seeks customized solutions for clients, whether they are doctor’s offices, hospitals or insurance companies.
